

CAPABILITIES STATEMENT

Community Commitment

As a Koniag-owned enterprise, we are beyond proud to reinvest in Alaska Native communities through workforce development, long-term sustainability, and economic opportunity.

When you work with us, you're not only choosing a partner, you're supporting Alaska's future generations.

What We Do

We provide end-to-end support for essential systems, including:

- Energy & Renewable Power Solutions
- Asset Integrity & API 653 Tank Inspections
- Industrial Automation & Controls
- Custom Panel Manufacturing
- ICS/OT Cybersecurity
- Custom Metal Fabrication
- Field Services, Installation & Maintenance

**WE BUILD SYSTEMS THAT
POWER COMMUNITIES, PROTECT
INFRASTRUCTURE, AND ADVANCE
ALASKA'S FUTURE.**

Proudly Alaska-based. Alaska-built.

Powering Alaska's Future

Koniag Energy & Water brings together over 150 years of combined Alaska industry experience to deliver reliable, high-performance solutions across energy, water, automation, staffing, and industrial technology.

Local Expertise. Global Standards.

Our knowledgeable Alaska-based subsidiaries combine specialized capabilities under one team, delivering seamless project execution from their concept and design to fabrication, installation, and long-term maintenance.

We understand Alaska's terrain, communities, and logistics better than anyone, and we pair that insight with industry-leading technical standards and innovative technology.

Automation and Controls

End-to-end solutions for industrial automation and control systems, including process control network setup and maintenance services.

Physical Security

Design and deployment of advanced physical security systems, including access control, thermal imaging, and hazardous location (HazLoc) video surveillance.

Connectivity

Satellite communications, outdoor and hybrid private networks, fiber solutions, fixed wireless broadband, and tower installation and maintenance.

Industrial Cybersecurity

Design and implementation of robust Operational Technology (OT) cybersecurity systems that protect critical infrastructure and industrial control networks.

Electrical and Mechanical Engineering

Support for projects ranging from grind & inject facilities, tank farms, and water treatment plants, specializing in industrial and wellhead control panels.

Professional Services

Placement of highly skilled professionals for highly specialized roles and projects across a wide range of industries.

Power and Renewables

Complete solutions for the installation, integration, and implementation of microgrid and renewable energy systems.

Electrical Services

Licensed professional workforce with broad expertise and field experience, including industrial, commercial, federal, and municipal projects of varying scale and complexity.

NRTL-Listed Panel Shop

Design and fabrication of custom UL/ETL panels for process controls, including unclassified, intrinsically safe, and hazardous location applications.

Custom Fabrication

Stainless steel and aluminum fabrication and welding. Specializing in chemical injection panels, tubing, hazardous location flex cables, and custom enclosures.

API 653 tank inspections

Professional API 653 tank inspections focused on safety, compliance, and extending asset service life in industrial environments.

Custom Engraving

Custom Engraving Phenolic and stainless engraving, including stainless dog tags and cable tags.

Stainless Steel and Aluminum Distribution

Multiple grades of stainless and aluminum components, including tubing, fittings, flanges, pipe, sheet metal, and more.
